Last year, we again achieved the highest possible rating with EcoVadis: Platinum! This puts Toppoint among the Top 1% of companies with EcoVadis ratings.

One of our highest priorities within Toppoint is sustainable and responsible business. Therefore, we want to be a leader in our industry as a socially responsible company. All sustainability practices are fully integrated into our processes, through transparency, involvement of all colleagues and continuous promotion of our code of conduct. Using the EcoVadis Methodology, Toppoint is assessed on our sustainability performance. This scorecard is filled using various themes such as environment, labour and human rights, ethics and sustainable procurement.

The scores are based on international sustainability standards, including the Global Reporting Initiative, the United Nations Global Compact and ISO 26000, which covers 200 issue categories and more than 160 countries. Our goal is to achieve the Platinum rating again in 2025, and will continue our activities with the EcoVadis methodology in mind!

A close-up photograph of a person's hands filling a silver metal water bottle from a public fountain. The fountain has a decorative, bird-like spout. The person is wearing a dark jacket and a ring on their finger. A red and white mesh tote bag is slung over their shoulder. The background is blurred, showing an outdoor setting with other people and structures.

GLASS WATER BOTTLES

Glass water bottles offer an elegant and eco-friendly way to stay hydrated. Unlike plastic bottles, glass bottles are free of harmful chemicals and can be reused repeatedly without affecting the taste of the water. Moreover, glass bottles do not retain odours, making them ideal for both water and other drinks such as juices.

LT98812 | Water bottle glass 500ml

The glass water bottle has a strap attached to the cap making it easy to carry around. Suitable for cold, carbonated and non-carbonated drinks. Comes packaged in a gift box. Size: ø 68 x 225 mm. Content: 500 ml

LT98823 | Water bottle glass with custom made sleeve 500ml

Glass water bottle with sleeve. Drinks stay cool for longer with its custom-made sleeve. Strap attached to the cap makes it easy to carry around. Suitable for cold, carbonated and non-carbonated drinks. The sleeve can be printed with a full-colour all-over imprint. Comes packaged in a gift box. Size: ø 68 x 225 mm. Content: 500 ml

LT98822 | Water bottle glass with sleeve 500ml

Glass water bottle with sleeve keeps drinks cool for longer. Strap attached to the cap makes it easy to carry around. Suitable for cold, carbonated and non-carbonated drinks. The sleeve can be printed with a full-colour all-over imprint. Comes packaged in a gift box. Size: ø 68 x 225 mm. Content: 500 ml

TRENDIER AND MORE ENVIRONMENTALLY FRIENDLY GLASSWARE!

Drink even more hipper and eco-friendly with our trendy glassware! Water, smoothies, or cocktails, our glassware adds style to any drinking experience. Made of high-quality glass with a sustainable FSC wood or cork cap. Personalise with a full-colour print or laser engraving for a unique look.

LT98870 | Glass bottle with cork lid 500ml

This bottle combines functionality with a minimalist design, paired with a natural cork lid. Size: ø 65 x 245 mm. Content: 500 ml

LT82833 | Carafe with cork top 1L

The Borosilicate glass bottle with cork lid can be used to serve water, juice or any other cold beverage, including carbonated drinks. This combination of glass and cork gives the carafe a natural look. This bottle is ideal for outdoor use as the lid will keep insects out. Size: ø 85 x 290 mm. Content: 1000 ml

LT82835 | Caraffe 550ml and drinking glass 250ml set

Sip in style with our Carafe and Drinking Glass Set. The 550ml carafe and 250ml glass defines elegance. Perfect for next to your bed or on your desk while working. Size: ø 74 x 176 mm. Content: 550 ml

LT98880 | Frosted glass bottle with cork lid 500ml

The Frosted Glass Bottle offers a 500ml capacity and a chic frosted finish, paired with a natural cork lid. Size: ø 66 x 205 mm. Content: 500 ml

LT98849 | Water bottle glass & bamboo 500ml

Experience style and sustainability with our 500ml glass water bottle and bamboo lid. Perfect for any occasion, it adds a natural touch to your hydration routine. Ideal for work, school, or errands, this reusable bottle is your daily hydration companion. Size: ø 63 x 225 mm. Content: 500 ml

DRINKING BOTTLES

LT98766 | Water bottle Tritan 600ml

Single walled transparent Tritan drinking bottle with coloured cap. This useful water bottle has a silicone strap attached to the lid to carry or attach to a bag. Suitable for cold, non-carbonated drinks. BPA-free. Comes packaged in a gift box. Size: ø 62 x 227 mm. Content: 600 ml

LT98877 | Water bottle Jude R-PET 500ml

Elevate your hydration with our 'Jude' R-PET bottle featuring a metal lid and versatile cord handle in various vibrant colors. Stylish, sustainable, and convenient—choose your color, carry with ease, and make every sip eco-chic! Can handle warm water up to 65 degrees. Size: ø 65 x 202 mm. Content: 500 ml

SUSTAINABLE WATER BOTTLES

Water bottles made of recycled plastic are much more than just a convenient way to stay hydrated. They are a powerful symbol of our commitment to a more sustainable and resilient world. By taking this small but important step, we can all contribute to a greener future for generations to come.

LT98876 | Water bottle Avery R-PET 600ml

Introducing 'Avery,' our innovative R-PET drinking bottle with a foldable straw cleverly stored in the lid. Size: ø 66 x 240 mm. Content: 600 ml

LT98878 | Water bottle Tatum R-PET 600ml

Introducing our 'Tatum' R-PET bottle with a durable rubber handle, perfect for your on-the-go hydration needs. The ideal choice for convenience and sustainability. Carry comfortably, sip confidently, and stay eco-friendly wherever you go! Can handle warm water up to 65 degrees. Size: ø 67 x 231 mm. Content: 600 ml

LT98824 | R-PET bottle frosted 600ml

Made from recycled PET, the Frosted R-PET Bottle offers both eco-friendliness and durability. With a 600ml capacity and available in various frosted colours, it's an ideal choice for eco-conscious consumers. Size: ø 67 x 233 mm. Content: 600 ml

LT98879 | Water bottle Nouvel R-PET 600ml

Introducing 'Nouvel' our innovative R-PET drinking bottle with a foldable straw cleverly stored in the lid. Can handle warm water up to 65 degrees. Size: ø 67 x 231 mm. Content: 600 ml

LT98743 | Water bottle Loop R-PET 600ml
 Single wall drinking bottle made of R-PET material. BPA-free.
 Suitable for cold non-carbonated drinks. Size: ø 66 x 256 mm.
 Content: 600 ml

LT98744 | Water bottle Loop transparent R-PET 600ml
 Single wall drinking bottle made of R-PET material. BPA-free.
 Suitable for cold, non-carbonated drinks. Size: ø 66 x 256 mm.
 Content: 600 ml

MIX & MATCH

ENDLESS COLOUR COMBINATIONS!

LT98742 | Loop bottle combi R-PET 600ml
 Single wall drinking bottle made of R-PET material. BPA-free. Mix and match the lid and body colours to create your own colour combination. Suitable for cold non-carbonated drinks. Size: ø 66 x 256 mm. Content: 600 ml

TOPPOINT

THE WORLD OF DIGITAL PRINTING

Add luxury to your products. High-quality digital printing and laser engraving by Toppoint

LT98739 | R-SS single wall bottle with carabiner 750ml

A durable single-wall bottle made from recycled stainless steel, featuring a carabiner for easy attachment to bags or gear. The bottle is lightweight, reusable, and ideal for staying hydrated on the go. Comes in various glossy and metallic colours. Comes in a giftbox. Size: mm. Content: 750 ml

DIGITAL HIGH GLOSS

Digital High Gloss ensures beautiful and bright colours on metal, plastic and glass products. This all-round digital printing technique uses a special coating that offers scratch and dishwasher resistance.

THE ADVANTAGES OF DIGITAL HIGH GLOSS

- 360-degree printing capability
- Largest digital printing production facility in Europe
- Large print format
- Photo-realistic
- Small quantities possible (available from 1 piece)
- Fast delivery

UV-HIGH GLOSS

Toppoint has been working with the latest machine in the field of UV printing since 2013. Bright (PMS) colours with high-quality graphics are applied in an environmentally friendly way. The result is a print that is dishwasher-proof, up to 500 washes. Various round and square items can be printed, e.g. mugs and glasses, as well as water bottles.

THE ADVANTAGES OF UV HIGH GLOSS

- Bright brilliant colours
- High-quality printing
- Wide range of Pantone colours feasible (e.g. cyan and magenta)
- Dishwasher-proof (according to DIN 12875)
- Environmentally friendly through use of UV inks (e.g. Cadmium free)

MIX & MATCH

Our own design water bottles are produced by Toppoint in Europe. The soft-squeeze water bottles are 100% leak-proof and have 'BPA-free' certification. The water bottles (available in 500ML and 750ML) can be printed nicely in full colour due to their large surface area. The colour of cap, bottle and even rim can differ from each other and be composed according to your wishes.

Choose the colour of the lid, the ring and the body

WHAT IS THE ADVANTAGE OF DOUBLE-WALLED GLASSWARE?

Double-walled glass creates an insulating layer of air between the inner and outer walls of the glass. This keeps hot drinks hot longer and cold drinks cool longer without the outside of the glass changing temperature too much. Moreover, a double-walled glass creates a visual effect where the contents of the glass appear to float.

LT50551 | Double wall coffee glass Marian 320 ml
 The double-wall coffee glass, with a generous 320 ml capacity, is a masterpiece of design and functionality. Crafted from high borosilicate glass, it elevates the coffee-drinking experience to a whole new level. Size: ø 83 x 114 mm. Content: 320 ml

LT50541 | Double wall coffee glass Marian 230 ml

WHY A CUP & SAUCER?

A cup and saucer are a classic combination for serving hot drinks such as coffee and tea. The cup provides a comfortable way to hold and consume the drink, while the saucer serves as a convenient platform to put spoons down or present delicacies. Together, they form a charming duo that is not only functional but also adds a neat look to any drinking experience.

SUBLIMATION

Sublimation printing is a form of transfer printing that uses heat-sensitive inks that bond with a surface coated for this purpose during printing.

This technique is only suitable for articles with a white background. The articles must have a polyester topcoat or there must be polyester in the product material.

ADVANTAGES OF SUBLIMATION

- Edge-to-edge printing surface
- Ideal for photo motifs and full-colour printing
- Suitable for mugs and thermos flasks
- Printed on up to 250 pieces available from 2 production days
- Dishwasher-safe

CORK

Cork is a natural material derived from the bark of the cork oak tree (*Quercus suber*). It is mainly produced in countries around the Mediterranean Sea, such as Portugal, Spain and Italy. Cork is known for its unique properties, including lightness, resilience, insulating capacity, water resistance and durability. It is widely used in various applications, such as wine bottle stoppers, flooring, fashion accessories, insulation material and decorative objects. Cork is also an eco-friendly material as it is renewable and harvesting the bark does not harm the cork oak tree.

BAMBOO

Bamboo naturally has the ability to absorb CO₂ from the air. By absorbing CO₂ from the air, bamboo helps combat the greenhouse effect. Bamboo's hollow and round structure makes it stronger than wood and it also bends further without breaking. Also, bamboo is the fastest growing plant, which means it can be produced much faster than other types of wood.

RECYCLED COTTON

Recycled cotton is the sustainable choice that gives a second life to discarded clothes and textiles. The life cycle of cotton uses a significant amount of water, energy and chemicals. Instead of throwing away textiles after use, they are collected, sorted and mechanically processed into new fibres. This saves resources and drastically reduces the ecological footprint.

Recycled cotton retains the softness and quality of new cotton, but with a much smaller impact on the environment. It can be reprocessed into yarns, fabrics and new products such as bags, reducing waste. Choose recycled cotton and contribute to a circular economy, where raw materials are reused and the impact on the planet is reduced.

LT95242 | Recycled cotton bag with gusset 140g/m² 38x10x42cm
This bag made of recycled cotton allows you to carry your belongings in a sustainable way. Size: 420 x 380 x 100 mm

CUSTOM-MADE AND GOOD FOR THE ENVIRONMENT

Toppoint custom-made laminated bags are strong and reusable. The PP Woven and Non Woven materials are recyclable and the PET Non Woven bags are made from 80% recycled PET bottles. This makes the custom-made bags a very eco-friendly and sustainable item. The finishing of our bags is extremely good: handles are finished with X-stitching, which is extra strong, and the piping is sewn in such a way that easy tearing is avoided.

Shopping bag 36x32x12cm, full-colour custom-made design possible, handles and piping in same material, handles 2.5x50cm.

R-PET BAGS

Made entirely from recycled PET bottles, our R-PET bags offer a sustainable alternative to disposable bags. By giving used plastic bottles a new life, you help reduce plastic waste and contribute to a cleaner world. Four plastic bottles are reused for each bag, making these bags a smart, eco-friendly choice. Perfect for everyday use, from grocery shopping to promotional events, they spread your sustainable message with style. Thanks to the long handles, the bags are comfortable to carry over the shoulder.

BENEFITS OF OUR R-PET BAGS:

- Made from 100% recycled PET bottles
- Soft, supple and lightweight material
- Foldable, reusable and durable
- Available in different models and colours
- Comfortable to carry, also over the shoulder

 This powerful 16.000mAh powerbank is from the 'Elite' series. Ideal to charge mobile devices on-the-go when the battery runs low. The powerbank has two USB-A ports and a Type-C port, making it compatible with a variety of charging cables. Comes packaged in a gift box. Size: 30 x 142 x 68 mm

EMPOWER YOUR BRAND WITH PORTABLE CONVENIENCE: **THE PROMOTIONAL POWER OF POWERBANKS**

In today's connected world, power banks have become essential for people on the go. They're more than just chargers—they're daily lifesavers. Imagine your brand visible and actively supporting your customers whenever they need power. Why are power banks ideal promotional products?

PRACTICALITY:

Power banks suit everyone, from commuters to travelers, giving them peace of mind. Your logo on a power bank becomes a trusted companion.

VISIBILITY:

Power banks are used in diverse settings—airports, offices, events. Each use reinforces your brand's reliability.

MODERN APPEAL:

Associating with technology shows your brand as forward-thinking and customer-focused.

VERSATILITY:

From 2,200mAh to 27,000mAh, we offer various designs, including models with LED lights, multiple ports, or slim sizes, catering to different needs.

WIRELESS CHARGING:

Modern power banks now feature wireless charging, allowing for a tangle-free experience with just a simple placement.

LONGEVITY:

Built to last, power banks keep your brand present for years.

SUSTAINABILITY:

Many of our power banks use recycled materials, and solar options support eco-friendly charging.

Power banks are more than chargers; they symbolize your brand's commitment to convenience and reliability. Invest in power banks and let your brand keep customers powered up and connected, anytime, anywhere.

POWER DELIVERY

Experience power and style with our powerbanks that support Power Delivery for ultra-fast charging. Besides their powerful performance, these powerbanks have a sleek, modern design that perfectly matches your style. Personalise them with your own logo or design, and make this indispensable gadget a unique accessory. Perfect for travelling, with both functionality and flair!

LT95508 | Power delivery powerbank Stratos 10.000mAh

This 10.000mAh power bank features power delivery and multiple outputs: two USB-A ports (12V-1.5A max each) and one Type-C port (12V-1.67A max). It offers overload, over-discharge, short circuit, and over-voltage protection for safe charging, ensuring fast and efficient power delivery for your devices. Size: 21 x 98 x 59 mm

LT95509 | 65W power delivery powerbank Stratos 20.000mAh

This powerful 20.000mAh power bank features a 65W output, allowing you to charge your laptop. It has two USB-C ports (60W & 65W max) and two USB-A ports (each 18W max), with a total max output of 65W for all ports combined. Quick and safe charging is ensured with protections against overload, over-discharge, short circuit, and over-voltage. Size: 48 x 105 x 48 mm

- EU refill with possibility to choose writing colour blue or black
- The refill has a 3 to 5 times longer lifetime
- All-round printing in up to 4 colours possible

Why sell a combi pen?

- Minimum 3 repeat orders
- Made to measure
- Increased perception value
- Distinctive product in the market - It leaves a lasting impression

** All parts are in stock in all colours.

YOUR BALLPEN IN YOUR OWN PMS COLOUR?

Possible from 10,000 pieces!

MADE IN GERMANY

In southern Germany, in the town of Gosheim, there is our own mould making and injection moulding plant GS Plastics. This is where we produce our Toppoint Design ballpoint pens. Another proof of the sustainable course we have taken. In this injection moulding plant, the components of our ballpoint pens are produced.

AND DESIGNED BY TOPPOINT

Toppoint Design ballpoint pens are produced at our in-house mould making and injection moulding facility. Volkmar Rommel is the designer of our high-quality Designed by Toppoint collection. This unique collaboration with Mr Rommel has already won several esteemed awards, such as the Good Design Awards

FAQ ABOUT OUR TOPPOINT 'MADE IN GERMANY' COMBI PENS

Is it possible to combine transparent, hard colour or frosty pen parts? Yes, this is possible as long as the parts come from the same model of pen.

From what quantity can I combine my own pen in different colours? This is possible from 250 pieces onwards. On Extranet you can check the availability of the colours per pen part.

How big can I print on the barrel of the pen? With a combi pen, we can print almost all over the barrel. You can find the print sizes on our Extranet under Printing Techniques. With the screen printing or 360-degree all-over printing technique, the barrel is printed before the pen is assembled. Hence the large all-round printing area.

I want to send my customer an offer with a sample, how do I do that? If you send our inside sales department an e-mail containing the item number, the desired colour combination and the customer's logo, we will quickly create a professional digital impression of how the pen will look, free of charge.

Can I get only the clip of the pen in a PMS colour? You can have all plastic parts of the pen in your own PMS colour, starting from 10,000 pieces.

Can I have several pens made into one visual? Yes, this is possible. If we have the right information, we can send you a nice visual within 1 working day.

I have a request for a large number of pens, but cannot wait for months. What can I offer? Toppoint produces the 'made in Germany' pens from A to Z in its own Plastic Injection Moulding plant. This makes us very flexible in producing the biro parts in any colour. In consultation, a lot is possible and we can always provide a partial delivery at no extra cost to you.

I am working on a nice biros project and would like to convince the customer to go for a Toppoint pen. How can Toppoint help me score the order together? If the purchase value of the project is at least 1,000 euros, we will gladly make free ready-to-use printed samples without any obligation. We will then print and assemble this sample completely according to the customer's wishes and it will be ready within a few working days.

How can I order a physical sample? By sending our inside sales department an e-mail containing all the information we need for a sample. They will process this in our system and you will receive your customised biros sample within a week.

Are the Toppoint Combi pens durable? Yes, because we produce the pens 100% in Germany. Production waste is 100% reused for new parts and transport is done by clean road transport. The biggest advantage is the writing capacity, because the Combi pens write 2.5 or 4.5 km and this is on average 3 to 5 times longer than a biro from outside Europe. You can't get much more sustainable, can you?

PRINTING TECHNIQUES

PRINTING TECHNIQUES DIGITAL PRINTING

In digital printing, the design is placed directly on a flat surface. The four full-colour base colours (CMYK) are mixed and the printer can use them to create any print. From full colour to photo-realistic images.

3D DIGITAL PRINT

3D digital print is basically the same as conventional digital print only this printing technique is provided with a resin layer that is placed over the print. This gives the print a three-dimensional effect through gloss and relief. 3D digital printing is mainly used on rubberised soft touch pens.

PAD PRINTING

In the past, pad printing was the most commonly used printing technique for promotional gifts. Pad printing is a type of stamping technique in which the design is applied to a cliché (a metal plate). One printing plate is needed per colour. Through the pad, a rubber image carrier, the design is transferred from the cliché and printed on the item. By using different pad shapes, it is possible to print on any flat surface and shape.

SCREENPRINTING

Round screen printing is a variant of screen printing specifically designed for printing round or cylindrical objects. The process of round screen printing differs from traditional screen printing in some respects because of the complexity of printing round items. During the printing process, the item is often rotated to ensure that everything is printed evenly. This technique is mainly used on writing instruments.

LASER ENGRAVING

Laser engraving involves engraving the design into the material. This printing technique uses a computer-controlled laser that engraves the top layer of the item, revealing the layer underneath. This technique is used on glass, ceramic, metal, tritan and wood.

2-TONE LASERGRAVERING In 2-tone laser engraving, the second colour is lasered more intensely to achieve a darker colour. This can result in a more visually appealing and dynamic design. This printing technique is mostly used for personalised items.

ATLAS

Toppoint design ball pen, made in Germany. This pen has a blue writing Jumbo refill for 4.5km of writing pleasure and is made with a hardcolour or soft touch finish.

TOPPOINT ECO PENS

We are aware of the environmental impact that several products have after using them. Pens also come un-separated at the landfills. Efforts to refill pens and let the receiver use them longer provides environmental benefits. It has also benefits for the company who gives the pen because they see their brand get more attention. At Toppoint we have pens that are refillable and easy to disassemble. That's why our pens have a long lifetime and can be offered as separated return flows. This makes sure that the raw materials can be recycled. So customers contribute to reducing CO2 emission and choose for products with a longer lifetime.

RECYCLED ABS

Recycled ABS is a type of plastic that is an opaque thermoplastic and amorphous polymer. Thermoplastic material is a meltable polymer; it can be moulded into a shape by heating it. ABS can be heated over and over again, which means ABS is a perfect material for recycling.

BIODEGRADABLE PLASTIC

Biodegradable plastic is a packaging material that degrades in the environment completely naturally. It is made from natural raw materials such as maize, cane sugar or potatoes. This prevents plastics from becoming plastics soup and reduces CO2 emissions.

PLA

PLA stands for polylactic acid. PLA is not made from petroleum but from a vegetable source. The basis of PLA consists of lactic acid, which is obtained from agricultural crops such as maize. Many PLA products are biodegradable.

BAMBOO

Bamboo naturally has the ability to absorb CO2 from the air. By absorbing CO2 from the air, bamboo helps combat the greenhouse effect. Bamboo's hollow and round structure makes it stronger than wood and it also bends further without breaking. Also, bamboo is the fastest growing plant, which means it can be produced much faster than other types of wood.

PAPER

Paper recycling is a process that converts waste paper into new paper products. The waste paper company takes the paper waste, cleans it and sorts it. It is then pressed into bales and transported to a paper or cardboard mill. The pulp forms the basis of new paper and cardboard.

WOOD

Wood is one of the oldest natural raw materials used by mankind. Trees get 90% of their nutrition from the atmosphere and only 10% from the soil. Wood is biodegradable material and a renewable resource.

We are extremely proud to have achieved the highest attainable rating Platinum at EcoVadis! This result places Toppoint among the Top 1% of companies with EcoVadis[1] ratings.

Our commitment to sustainability and CSR

Sustainability and corporate responsibility are one of our key drivers. Therefore, being a leader in our industry as a socially responsible company is one of our top priorities. We want to ensure that sustainability practices are fully integrated into our operations by promoting transparency, employee engagement and our code of ethics. The EcoVadis methodology is based

on international sustainability standards, including the Global Reporting Initiative, the United Nations Global Compact and ISO 26000, which covers 200 spending categories and more than 160 countries. The Sustainability Scorecard illustrates Toppoint's performance as an organisation on 21 indicators in five themes:

- Overall business score
- Environment
- Labour & Human Rights
- Sustainable Procurement
- Ethics

SEED/GROWING PAPER

Seed paper is made in a bath with a mixture of water, plant and/or flower seeds and paper pulp. A sieve is pulled through the substance and a thin layer of paper forms. After drying, it is transformed into a plantable and biodegradable paper product that grows into an herb plant, vegetable or flower after planting. After the product is consumed, put the paper in some soil and water it. Over time, the seeds germinate and can grow into lavender, daisies, chrysanthemums, mint and cherry tomatoes..

LT92526 | Seed paper spiral notebook

Nice set of adhesive notes made of seed paper. When you plant the cover and water it, the mixture of seeds will sprout. Your message will flourish, making this a sustainable and unique item. Contains: 100 pages of recycled paper with checkered pattern. Size: 148 x 110 x 17 mm

LT92527 | Seed paper adhesive notes set

Contains: 100 sheets of recycled paper with checkered pattern, 25 adhesive notes and 25 sheets of page markers in 5 colours. Size: 150 x 80 x 15 mm

ROCK PAPER

The paper industry is one of the biggest polluters in the world. Stone paper requires no deforestation, water wastage or CO2 emissions. This nature-friendly alternative is made from waste and is barely distinguishable from normal paper. TopEarth's tree-free softcover notebook is made from 100% circular stone paper

Rock paper

LT92520 | Rock paper notebook A5

The sheets of this notebook were made from rocks. The result is a strong, smooth sheet of paper with a remarkably cool touch. The sheets are perforated on the side making it easy to tear them out. Size: 215 x 155 x 15 mm

LT90772 | Puzzle tray square

Puzzle tray, square. Full-colour print possible. Size: 6 x 75 x 75 mm

LT90770 | Puzzle tray

Puzzle tray, rectangle. Large print surface for a logo. Full-colour imprint possible. Size: 6 x 90 x 75 mm

A young woman with brown hair tied back, wearing a blue and white striped shirt and a dark apron, is smiling as she prepares food in a kitchen. She is holding a white smartphone in her left hand and a small white bowl in her right hand. In the foreground, there is a tray of bread topped with tomatoes, cheese, and green sauce. The background shows a kitchen with a window and a circular object on the wall.

ALWAYS INFORMED, EVEN IN CASE OF POWER FAILURE.

An emergency radio continues to work when other devices fail, thanks to multiple power sources such as a solar panel, wind-up mechanism and batteries. Indispensable during emergencies, the emergency radio provides crucial updates of disaster stations even without mobile network or internet. Also ideal for outdoor activities like camping and survival, where the self-sufficient power sources ensure you always have access to news.

CONVENIENCE AND EFFICIENCY

Wireless charging makes charging your devices easy and, of course, cable-free. Technologies like MagSafe and Qi2 make this experience even better. MagSafe, developed by Apple, uses magnets to perfectly position your iPhone on the charger, ensuring an optimal charging experience without your phone shifting. Qi2, the latest standard for wireless charging, also uses magnetic positioning for more efficient charging. This technology offers faster charging times and higher efficiency, ensuring your devices are fully charged in less time. The benefits of wireless charging are numerous: no more cables, safe charging with built-in protections, and compatibility with a wide range of devices. With MagSafe and Qi2, you enjoy the convenience of wireless charging wherever you are!

THE EVOLUTION OF BLUETOOTH

Bluetooth has evolved significantly since its launch in 1999. In 2010, Bluetooth 4.0 introduced Low Energy (LE), allowing devices to function longer with lower battery consumption, ideal for wearables. Bluetooth 5.0, launched in 2016, increased the range to 240 metres and doubled the transfer rate to 2 Mbps. The more recent versions, Bluetooth 5.2 (2020) and 5.3 (2021), improved sound quality and enabled LE Audio, which lets you stream audio to multiple devices without losing quality. The latest version, Bluetooth 5.4, was introduced in 2023 and offers improved energy efficiency and support for new applications. Bluetooth is now an indispensable technology in our daily lives.

STEADILY FASTER

Fast Charging and Power Delivery (PD) are technologies that charge devices faster by delivering higher powers. Fast Charging is ideal for smaller devices such as smart[1]phones and delivers quick boosts at lower powers. Power Delivery is more powerful and flexible, designed to charge both smaller and larger devices, such as laptops, faster. Power Delivery is the more universal standard of the two methods and works via USB-C. Check that both device, charger and cable support the same standard for the most optimal result. To transfer data, the cable must be suitable for this. USB-C cables with PD support can often also handle data transfer, but not all fast-charging cables do. So always check if the cable supports both fast charging and data transfer to be sure of all the benefits.

NFC EASY CONNECTION

NFC, or Near Field Communication, is a technology that allows devices to exchange data wirelessly over short distances, usually within a few centimetres. It is commonly used in smartphones and payment cards for mobile payments and information sharing. It is an easy, fast and secure way to connect without complicated settings.

ANC (HYBRID) AND ENC

Active Noise Cancelling (ANC), Hybrid ANC and Environmental Noise Cancellation (ENC) are technologies for noise isolation in headphones and earbuds. ANC uses microphones to pick up ambient noise and generates an opposing sound wave to neutralise it. This is especially effective in quiet environments or constant noises such as the hum of an aeroplane. Hybrid ANC combines traditional ANC with additional microphones on both the inside and outside of the earbuds. This makes it better able to block different types of ambient noise, such as conversations in a busy environment or the noise of traffic. ENC aims to reduce ambient noise during conversations so that your voice comes across clearer. It uses microphones to filter out unwanted noise and ensures that background noise does not interfere during phone calls. To transfer data, however, the cable must be suitable for this. USB-C cables with PD support can often also handle data transfer, but not all fast-charge cables do. So always check if the cable supports both fast charging and data transfer to be sure of all the benefits.

INSIDE
OUT

A SCENTED STONE FOR RELAXATION AND AMBIENCE

The scented stone principle has been used for thousands of years. Essential oils have traditionally been valued for their relaxing and invigorating properties, from ancient Egyptian rituals to traditional medicine in China and India. By dripping a few drops of oil on the stone, the oil soaks into the porous surface and slowly evaporates, spreading the fragrance subtly through the room. Perfect for smaller spaces such as the bedroom, hallway, toilet or wardrobe, to de-stress or simply enjoy a fine fragrance.

LT57304 | InsideOut Aroma Pebble Giftset with 6 essential oils

Create a calming atmosphere with the Aroma Pebble Giftset with 6 Essential Oils. The unglazed ceramic stone absorbs oil without heat or electricity. Includes 6 natural oils (10ml per bottle) for your desired scent. Place the stone at home or in the office as a lucky charm and enjoy relaxing aromatherapy. Beautifully packaged, ideal as a gift.
